

## GOSS iCM version 8

### Product highlights

#### *Management of mass web content*

**What it does:**

Allows web managers to view content in an Excel/grid style. The tool gives administrators the power to create, sort, edit, delete and move high volumes of content, including web pages and multimedia files, in one operation.

**What it means:**

Web managers will be able to save time. Large amounts of content can be quickly and easily viewed and amended on one screen.

**Next steps**

For more information, a demonstration or to migrate your site to V8 for free (if you have a support contract) call your Account Manager on 01752 517350

#### *Mass file uploading*

**What it does:**

Web managers can now mass upload multimedia files simultaneously and at the touch of a button.

**What it means:**

Mass content can be uploaded, sorted and have attributes amended en-mass making great time savings

#### *Web 2.0*

**What it does:**

The ability to use and manage Web 2.0 content; from embedding social videos to enhancing your content using third-party applications such as Google maps, RSS feeds and other gadgets or plug-ins.

**What it means:**

Even more power to create engaging, cutting edge websites, directly from iCM.

## Product highlights

### *Page validators*

**What it does:**

The introduction of page validators to allow external services to examine page content pre- or post- publishing and return their status. Pre-configured validators are supplied to check pages against W3C, WAI and readability or users can add their own validators as required.

**What it means:**

More time saving by ensuring your content is accessible first time, before publishing. Plus ensures you can attain the highest accessibility levels with greater ease.

### *Improved interface*

**What it does:**

The iCM interface has been simplified to allow users to perform actions more intuitively.

**What it means:**

Contributors will be familiar with many of the powerful Word style web authoring tools, so will require less training.

### *Contribution improvements*

**What it does:**

Improved content contribution assistance insures contributors are guided through the process of supplying all the correct information that administrators specify to meet internal standards or other accessibility guidelines. Administrators control the prompts and help text that contributors see whilst contributing.

**What it means:**

Contributors will know exactly what content to is required and where to place it.
